

GEMINI

Advanced urodynamic systems built for every practice

A versatile line of systems tailored
to your needs

Better urodynamics systems for your practice

Symphony SC

Fully loaded system for video urodynamics (VUDS)

Symphony SC is the most advanced, comprehensive urodynamics system on the market. Equipped with innovative features, this all-in-one platform effortlessly performs both video urodynamics (VUDS) and urethral pressure profile (UPP) studies. Dual touchscreen interfaces and an adjustable ergonomic workstation make it easy and efficient to navigate complex urodynamics procedures.

Advanced features include: robotic UPP puller set for UPP, valsalva leak point pressure camera, and integrated 3D bladder scanner.

Symphony ML

Premium system designed for advanced urodynamics

Symphony ML is a premium trolley system designed to meet the needs of medium to high-volume practices seeking advanced functionality. With a touchscreen interface and an adjustable ergonomic workstation, Symphony ML is intuitive and easy to use. It is upgradable to perform UPP studies and can be enhanced with additional features to further expand its capabilities.

Optional advanced features include: robotic UPP puller set for UPP, valsalva leak point pressure camera, and integrated 3D bladder scanner.

✓ Intuitive & modern

✓ Bumper-to-bumper warranty

✓ Smarter reporting

✓ On-demand availability

Symphony EL

Streamlined system for everyday urodynamics

Symphony EL is a streamlined urodynamics system, designed for practices needing an efficient, cost-effective system for everyday use. With a built-in monitor and adjustable trolley, Symphony EL is compact and easy to maneuver, offering a practical and reliable option for performing comprehensive urodynamic procedures with ease and efficiency.

Melody

Compact system designed for efficient urodynamics

Melody is a straightforward, compact urodynamics system designed for practices seeking a portable, easy-to-configure, and cost-effective solution. Mounted on an IV-pole, this wireless and modular system utilizes radiofrequency technology to connect seamlessly to the included pre-configured laptop, providing the capability to perform a full range of urodynamics procedures.

Compare Models

Our advanced urodynamics systems range from compact to comprehensive, allowing you to choose the best fit for your practice's needs. Each system includes a wireless Harmony (CMG/EMG) and a wireless uroflowmeter, ensuring built-in redundancy and comprehensive diagnostic capabilities.
